## DETAILED ACTION

### *Claim Objections*

1. Claims 177 and 225 are objected to because of the following informalities: Claims 177 and 225 depend from respective canceled claims 174 and 222. Appropriate correction is required.

### *Information Disclosure Statement*

2. On PTO-1449 filed 1/29/04, the first listed foreign reference document number 450432 is not accompanied by a statement of relevance. The examiner has not considered it.

### *Double Patenting*

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 132-136, 148-150, 156-158, 162-171, 173, 178-185, 197-199, 205-207, 211-219, 221, 223, 226-228, 242, 246-251 and 262 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-15 of U.S. Patent No. (6113239). Although the conflicting claims are not identical, they are not patentably distinct

from each other because applicant claims the structure of the present invention in US Pat. (6113239). The only limitation of the present invention not included in the claims of US Pat. (6113239) is initial étendue, a measurement of optical throughput, and since the present invention is comprised of the same structure, the limitation directed to initial étendue is considered inherent to the invention claimed in US Pat. (6113239).

### *Response to Arguments*

5. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

### *Conclusion*

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Chuang et al. (5666447) are cited for defining optical étendue (col. 1, lines 51-60).

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
